**Subscription information.** Acta Scientiarum Mathematicarum is published twice a year. Subscriptions, orders, notices of change of address etc. should be addressed to KATALIN NAGY at ACTA DISTRIBUTION, BOLYAI INSTITUTE, UNIVERSITY OF SZEGED, ARADI VÉRTANÚK TERE 1, H-6720 SZEGED, HUNGARY. This office can be reached via e-mail at [ACTASM.DIST@MATH.U-SZEGED.HU](mailto:ACTASM.DIST@MATH.U-SZEGED.HU). For further information visit our web site [HTTP://WWW.MATH.U-SZEGED.HU/ACTA](http://www.math.u-szeged.hu/acta).

## Information for authors

Acta Scientiarum Mathematicarum publishes pure mathematics papers that contain new and significant results. The article must be well written and of interest to a substantial number of mathematicians.

Articles should be submitted to the Editor-in-Chief in three copies and authors should indicate if the paper has been prepared using any dialect of  $\text{\TeX}$ . By submitting a paper, the author(s) certify that the manuscript has not been submitted to and is not under consideration for publication at another journal, conference proceedings, or similar publication.

The language of the paper should be English (in exceptional cases German or French). On the first page of the manuscript a *descriptive title* and the *names* and *affiliations*, together with the *mail* and *electronic addresses*, of the authors must appear followed by an *abstract* that summarizes the article in English. The abstract should be at least one complete sentence, and at most 15 lines. The AMS classification numbers should be also given.

Authors should take the greatest possible care in preparing the manuscript. We encourage our authors to use any available dialect of  $\text{\TeX}$  to prepare their papers. To comply with general conventions of style used in our Acta, recent issues beginning with volume 57 should be consulted.

After acceptance, the authors will be asked to send the manuscript's  $\text{\TeX}$  file, if any, via email to ACTASM.EDITOR@MATH.U-SZEGED.HU, or on diskettes to the Editor-in-Chief. Receiving the  $\text{\TeX}$  source file may considerably speed up the publication of the paper.

No manuscript will be sent back to the authors.

Authors of papers accepted for publication will receive only one proof. Joint authors should indicate to which of them the proof should be sent.

Fifty reprints without covers will be supplied gratis. Additional copies may be obtained at the approximate cost of production.

Any inquiries concerning a paper that has been submitted for publication should be addressed to the Editor-in-Chief.

# CONTENTS

## Algebra and Number Theory

K. PIÓRO, The weak subalgebra lattice of a unary partial algebra of a given finite unary type .....	439
R. WILLARD, Solution to the Chautauqua problem .....	461
J. M. DUMONT, P. J. GRABNER and A. THOMAS, Distribution of the digits in the expansions of rational integers in algebraic bases .....	469

## Analysis

Zs. PÁLES, Strong Hölder and Minkowski inequalities for quasiarithmetic means ..	493
J. A. CIMA and A. G. SISKAKIS, Cauchy transforms and Cesàro averaging operators	505
J. V. MANOJLOVIĆ, Oscillation theorems for nonlinear second order differential equations .....	515
N. C. KOUROGENIS and N. S. PAPAGEORGIOU, Periodic solutions for quasilinear differential equations with discontinuous nonlinearities .....	529
W. BALSER and M. MIYAKE, Summability of formal solutions of certain partial differential equations .....	543
P. WALL, Optimal bounds on the effective shear moduli for some nonlinear and reiterated problems .....	553
Y. G. SHI, A kind of extremal problems of integrations on an arbitrary measure ..	567
F. KÁDÁR and G. RÉKAI, Classes of functions and Riemann means of Fourier series	577
S. BARON and F. SCHIPP, Topological properties of complementary spaces for double Walsh series .....	585
S. O. PERRINE and W. R. WADE, Sets of uniqueness for classes of Vilenkin series ..	597
U. STADTMÜLLER and R. TRAUTNER, Continuity theorems and ratio-Tauberian theorems for integral transforms .....	611
J. J. BETANCOR, On asymptotic behaviours of Boehmians and Zemanian distributions .....	635
IN HO JEON, On the Taylor–Browder spectrum. II .....	651
A. BISWAS, C. FOIAS and A. E. FRAZHO, Weighted commutant lifting .....	657
Á. LÁSZLÓ, About the norm of some Gramians .....	687
